DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Moore (US 5,954,912).

Regarding claim 12: Moore teaches a rotary coupling comprising a housing 122 with an internal top surface and an internal bottom surface and a valve ring (floating coupling head 144). Figs 4 and 5 illustrate that the valve ring moves to the internal bottom surface on the application of a vacuum to the housing.

Regarding claim 13: Moore teaches a plurality of tubes connected to an internal bottom surface wherein the valve ring covers the plurality of tubes (130 and 142) when a vacuum is applied to the housing.
